

A row of modern, two-story houses with grey siding, white trim, and dark grey roofs, set against a clear blue sky. The houses are arranged in a line, receding into the distance.

H2O Leak Detect provides a smart and effective solution to protect your investment.

Detect water leaks in **real-time** to take action before damage occurs.

- ✔ Prevent water damage and costly repairs
- ✔ Maintenance? The only maintenance required is changing sensor batteries occasionally. Average battery life is 3 – 5 years
- ✔ A stainless-steel valve is installed on the incoming water line to your home (in the case of boiler systems, two valves are installed - hot and cold-water lines)
- ✔ Secure, wireless leak sensors are placed at all water sources in your home (toilets, sinks, dishwasher, washing machine etc.)
- ✔ Simultaneously, a notification is sent to the homeowner alerting them that water was detected, and the valve has been closed
- ✔ Reduce insurance costs and deductibles
- ✔ Over 18,000 systems and 150,000+ sensors installed in Canada

Why do I need a water alarm System?

- ✔ To mitigate the rising cost of insurance premiums and deductibles
- ✔ Water mitigated buildings often receive reductions in their deductibles, and a cap on the premium
- ✔ 93% of all water damage is avoidable
- ✔ Water damage accounts for over 60% of insurance claims
- ✔ Appliances, new and old, are a major source of leaks
- ✔ Recognized by major insurance carriers and a member of PREVCAN, the water damage prevention association of Canada
- ✔ Utilizes LoRa communication technology, the most secure and reliable communications protocol available
- ✔ Safeguard against potential liabilities
- ✔ Local ongoing assistance and technical support
